Experience

From March 2014 to now:

*Company***:** 5 Stars Software Solution Co, Vietnam (http://5stars.com.vn).

*Position***:** Programmer.

I have joined three projects, language use is ASP/C#.

- SCC project: Project manages about salesman, route, customer, distributor…This project manage many distributors in many regions. We also manage product, order, invoice, inventory, salesman target, promotion program, cumulative program, display program. This project have many reports such as: Salesman performance, Stock movement, stock receipt, promotion by product report, promotion by customer report and many reports about income.

- DMS5 project: This is a Data Management System like SCC. It also manages about sale, customer order, invoice, income… But it has many of sale business. In this project we not only use Computer but also use Smartphone (android smartphone) to create order, Salesman can sale without a computer, all order create by Smartphone will be synchronize to our server, then process by a local admin. The language we use in Smartphone is java.

- CP-SMS project: Project manages about creating and sending SMS to multiple customer or salesman. SMS content is about salesman salary or promotion for customer.

- Beside three projects in company, I have an application develop by myself (Download http://goo.gl/UNc0N3). It uses to rename multiple file at the same time. I write it by c# (Windows platform) .Use this application we can rename file to lower, UPPER, First Upper…; find and replace in file name; cut file with a special character; add word to begin or end of file; add order number to file; in mp3 file my app can remove all details (title, album, singer…) of file; and many of other functions. My application have a special feature not in others rename software, this is remove Viet Nam signs in file name (Viet Nam signs make file not work with many applications, it need to be remove).

Job target
